# WHO WE ARE

## ABOUT US

Future Nutrition is an Irish family business in ownership and nature. We pride ourselves on product quality, innovation and service in everything that we do. It is our passion, it our focus, and it is what we believe creates the future of nutrition for the sport, active and lifestyle consumer.

## OUR RICH HISTORY

Established in 2010, Future Nutrition is located on the same original site as our sister company Donohoe Drinks who have developed, manufactured and bottled spirits, beers and soft drinks since 1876. We have grown from a fast paced start up to global functional beverage manufacturer, working with some of the largest consumer functional beverage brands across the globe. Our trademark agility allows us to work with small, medium and large clients.

## OUR STRENGTHS

**INNOVATION**

**QUALITY**

**SERVICE**

## QUALITY & SUSTAINABILITY

Future Nutrition is committed to minimizing waste, reducing energy use, using environmentally friendly materials and manufacturing socially responsible products.

In the past year alone we have successfully achieved sustainability targets in relation to environmentally friendly packaging solutions, electricity and water usage reduction, waste management and health innovations. We also endeavor to support our local community in the form of event sponsorship such as the annual Tri The Hook Triathlon.

## ACCREDITATIONS

### ORIGIN GREEN

We are verified members of Origin Green, Ireland's food and drink sustainability program. To earn Origin Green status we must set and achieve measurable sustainability targets that respect the environment and serve our local community.

### INFORMED SPORT

Our facility is WADA- and IOC-banned substance free, and is accredited by Informed Sport, providing clients with confidence that their new product will be suitable for everyone from amateur sports people to professional athletes (batch testing required).

### ISO FOOD SAFETY

Our manufacturing plants are accredited with ISO 22000:2018.

### ESSNA

We are members of ESSNA, the European alliance of responsible sports nutrition producers and brands.

# WHAT WE DO

## OUR CAPABILITIES

We are an experienced team that is fully focused on helping you to develop the best tasting functional beverages and ready to mix powders.

From functional shots, to protein waters to energy drinks.  
From protein powders, to preworkout to superfoods.

## FUNCTIONAL BEVERAGES

With state-of-the-art machinery and extensive experience, we produce great tasting and stable formulations no matter the complexity of your brief.

From energising the world of pre workout, to re-imagining the future of brain performance and nootropics – we are focused on the advancing world of functional drinks. Add to that a lifestyle twist of diet and detox, mind and body, or joint and bone – we have the expertise and knowledge to develop a drink for all consumers, no matter the sport, activity, goal or occasion.

## READY TO MIX POWDERS

We develop powders that are on trend and challenge the market with leading formulations and best in class taste. We pride ourselves on our eye for quality such as homogenous powder and solubility.

Be it a good, better or best protein blend to build muscle, a classic carbohydrate electrolyte powder to improve endurance, or a modern day meal replacement as convenient food, there are no powder concepts beyond our capabilities. And if you want to go flexi on us, then we've perfected the best tasting vegan, plant and superfood powders too.

## WHERE WE FOCUS

We are experts in four markets.

### SPORTS NUTRITION

Whether it is to build muscle or increase endurance, we can help you develop the next pre workout, protein drink or recovery drink.

### ACTIVE NUTRITION

Sports nutrition has gone mainstream, and so have we. Energy drinks are the new pre workout, nootropics is the alternative to stimulants, and protein maintains healthy muscles.

### HEALTH & WELLNESS

If you are not healthy, you can't perform (in life). We have all things functional and better for you whether it is to maintain immune function, weight wellness or support the inner you!

### GAMING

Whether it is Call of Duty, League of Legends or Street fighter 2, we develop products that keep the gamers energised, focused and on top of their game.

# HOW WE DO IT

From concept to reality.

A journey of vision, insight and co-creation. We help you to design and deliver the best tasting and on trend products that consumers want. Working systematically through three stages, we support you with knowledge of what is possible. That is the best ingredients, the latest science, and an understanding of regulation and compliance.

A true end to end solution.
